

**Message from  
Editor in Chief of  
Thai Journal of Gastroenterology 2012-2014**

---

*Dear Members*

The second issues of Thai Journal of Gastroenterology for the year 2012, the editorial board still work hard to achieve the difficult task. In this issue, we have 7 original articles in various fields of GI diseases from our fellows. The new diagnostic endoscopic ultrasonography (EUS) for diagnosing pancreatic or gastric submucosal lesions is shown in Endo corner. The “Hepatic Adenoma” is interested in X-ray corner. The diseases of esophagus are shown in Patho corner. Moreover, from the topic review, you will find “Protective effects of curcumin on gastric inflammation and liver diseases”.

Finally, we would like to say congratulation to our recent graduates from passing the GI board examination. We hope they will success in their ways and keep in touch with the Gastroenterology Association of Thailand forever.

**Duangporn Thong-Ngam, M.D.**
