

## Message from Editor in Chief of Thai Journal of Gastroenterology 2007-2008

This is the last issue of Thai Journal of Gastroenterology for this year 2007. We published two issues already; it is our plan to improve the quality of our journal. We can't able to work more effective without our editorial boards and our members to submit more quality manuscripts. In this issue, we have many beautiful pictures from "Multiple Faces of Focal Nodular Hyperplasia". There is an interesting case report of Duodenal Metastasis from Caecal Adenocarcinoma. Moreover, from our topic review, you will find Screening Colonoscopy: Focusing on Age and Gender. We also have 5 original articles in various fields of GI diseases.

On behalf of the editorial board of TJG, I would like to express my deeply regret to an unexpected loss of Dr. Kriengkrai Akarawong, one of the most respectful GI teacher in Thailand. His invaluable contribution is greatly appreciated and will forever be remembered.

Finally, hope to see you all in The 2<sup>nd</sup> APASL Autumn Single Topic Conference 2007 in Pattaya, Thailand.

**Duangporn Thong-Ngam, M.D.**

*The Editor in Chief*
